Thompson River District

MANAGEMENT DIRECTION STATEMENT

October, 1999

for Bedard Aspen Provincial Park

Ministry of Environment, Lands and Parks

BC Parks Headquarters 2nd Floor, 800 Johnson Witterie, BC VSV 184

Victoria, BC V8V 1X4 Phone: (250) 387-5002 Fax: (250) 387-5757

APPROVALS

KAMLOOPS GOAL 2 PROTECTED AREAS MANAGEMENT DIRECTION STATEMENTS - GOAL 2 BINDER APPROVALS PAGE

Forward

This binder contains 32 management direction statements developed under the direction of the Kamloops Land and Resource Plan Implentation Table and BC Parks. The government designated these protected areas in May, 1996. The 32 management direction statements provide strategic direction for these protected areas. Protected areas' roles, strategies and objectives will not change extensively over time. Management actions, implemented through operations plans, however, will change as priorities, funding and support resources come available.

Purpose of Management Direction Statements

Management Direction Statements provide strategic management direction for all protected areas that do not have a full management plan. MDS do not negate the need for future, more detailed management plans. Management Direction Statements also describe protected area values management issues and concerns; management strategy focused on immediate priority objectives and strategies; and, directional statements from other planning processes. While strategies may be identified in the MDS, the completion of all these strategies is subject to funding and funding procedures. In addition, all development associated with these strategies within the protected area is subject to the BC Parks Impact Assessment Policy.

BEDARD ASPEN PARK

MANAGEMENT DIRECTION STATEMENT

I. Introduction

A. Setting and Context

173 hectare Bedard Aspen Park protects an area of high diversity around a small lake in the Pavilion Ranges. Situated 40 kilometers west of Cache Creek, access to the Park is north on Highway 97, west along Highway 99, then south along the Hat Creek road and logging roads.

This protected area was recommended through the Kamloops LRMP process and formally established on April 30th, 1996 as a provincial park through Order-in-Council under the *Environment and Land Use Act*. The park was then designated in Schedule E of the *Park Amendment Act*, 1997.

This Management Direction Statement is intended to provide direction and guidelines for managing Bedard Aspen Park for the foreseeable future.

II. Protected Area Values

A. Conservation

- small lake perched above a large area of slope instability; top end of long earthflow into Three Sisters and Oregon Jack Creeks
- edge of Kamloops group lava along western side, otherwise Cache Creek limestone
- area of slope instability is comprised of hummocky slopes and flats and has mixed forest of aspen and willow, with some old-growth Douglas-fir and spruce, grassy openings and pocket wetlands
- combination of small lake rich in insects and crustaceans with the deciduous stands and distinctive landforms creates high biological diversity
- habitat for moose, loons, sapsuckers, grouse, cavity-nesters and other species dependent on large deciduous stands

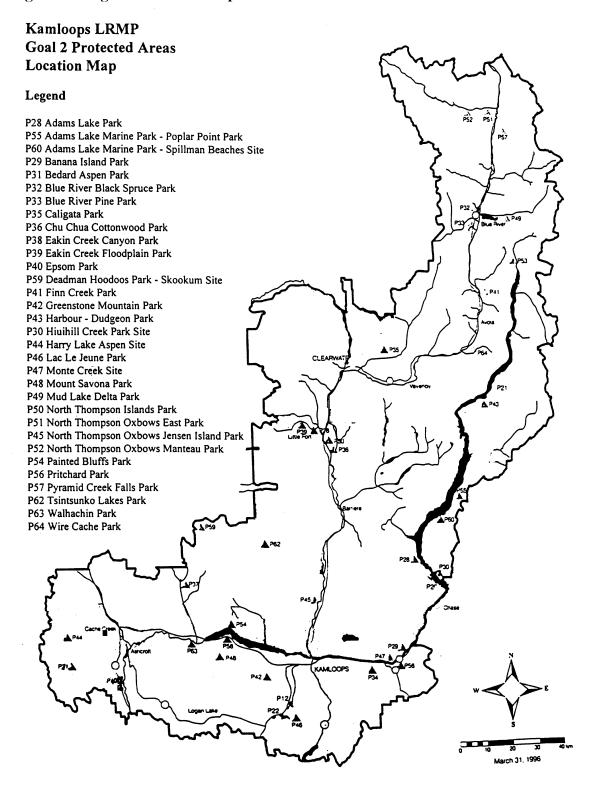

B. Recreation and Tourism

- trail provides good lake access from both eastern and western roads
- lower ridges provide easy walking
- potential for good bird watching in varied habitats

C. Cultural Heritage

- unknown
- potential use as a camping and food gathering spot

Figure 1 - Regional Context Map

D. Significance in the Protected Areas System

- representation of aspen/Douglas-fir/grassland associations in a richly diverse area
- along with Harry Lake Aspen Park, fills an important gap in representation of the Pavilion Ranges Ecosection not captured in the large protected areas.

III. Other Land Uses and Interests

A. Existing Tenures

- Park designation under the *Park Amendment Act* ensures that all existing liens, charges, and encumbrances other than those applying to commercial logging, mining or energy exploration and development will continue to be authorized through issuance of park use permits. This policy recognizes all existing land act tenures, water rights, trapping licenses and other legal tenures and rights.
- Park designation provides for continuance of existing grazing under administration and management of the *Range Act*. There are approximately 200 AUMs allotted to the park out of a much larger range management unit. Under the *Park Amendment Act* no additional AUMs will be granted over the existing allotment.

B. Adjacent Patterns of Land Use

- logging roads and large cutblocks on north and west. See Longer Term Issues and Concerns Section on page 6.
- ranchers use the land in and adjacent to the park for summer grazing

C. First Nations Interests

• unknown, but near areas of known importance

D. Other Agency Interests

The Park will be managed in close co-ordination with various resource agencies, particularly BC Environment and Ministry of Forests.

E. Private and Public Stakeholder Interests

• two grazing licenses in the park

IV. Management Issues and Concerns

A. Integration with Other Land Use Planning Processes

This management statement, future management statements, and all resulting management actions will follow the intent and criteria set out by the Kamloops LRMP for the Bedard Aspen protected area.

B. Consultation and Future Planning

Planning and management of the park will conform to the goals, objectives and guiding principles as set forth in the Provincial Protected Areas Strategy. BC Parks is accountable for planning, administration and management of the park through application of the laws, policies and regulations granted under the *Park Act*. BC Parks will coordinate with other agencies, the LRMP table, various public planning groups and First Nations in amending the MDS or developing management plans for all of the new protected areas arising from the Kamloops LRMP.

This Management Direction Statement has been reviewed and approved in principle by the Kamloops LRMP implementation team.

C. Role of the Park

The primary role of this park is the protection and conservation of natural values and habitats. The Park is one of a number of new protected areas (Cornwall Hills, Oregon Jack, Blue Earth and Harry Lake Aspen) that together represent diverse landscapes and ecosystems of the Pavilion Ranges Ecosection. Within this system of parks, Bedard Aspen Park fills an important gap in representation of aspen- Douglas fir and grassland habitats

D. Zoning

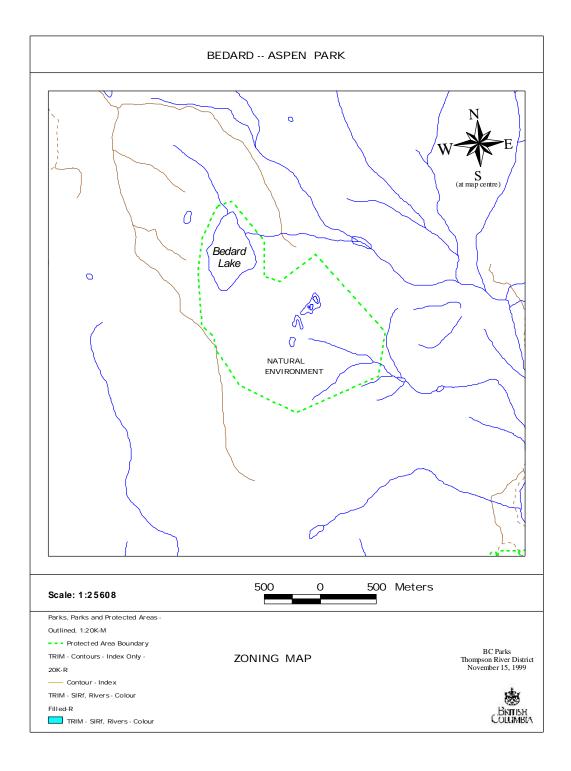

The zoning plan as shown on the adjoining page reflects the intent of the LRMP recommendations for the Bedard Aspen Park. The Park is zoned as **Natural Environment** to maintain the area in a natural condition while allowing some recreational use.

E. Management Objectives and Strategies

In addition to accepting the basic principles of maintaining existing tenures and rights, the following objectives will direct the short and long-term management of the area:

- to maintain the natural qualities and conditions of the park
- to foster relationships with First Nations through ongoing consultation and discussion of their concerns and views on protected area management and planning
- to maintain the visual and recreational values
- to maintain the diversity of wildlife species and habitats
- to discourage the introduction of non-native plant species
- to allow continued casual recreation use hiking, natural history viewing, hunting
 - ⇒ do not emphasize recreation or facilitate public access and use of the site.

Figure 2 - Zoning Map

F. Longer Term Issues and Concerns

Specific issues that will be considered in the longer term can be highlighted under the following topics:

Conservation

- inventory of conservation values
- vegetation management insect and disease control; forest encroachment into grasslands, fire management, grazing management
- adjacent land use access roads have been deactivated and no logging will occur for some time. BC Parks will be involved in the review of any future proposed logging plans through the normal Ministry of Forests referral process.

Recreation

- access management
- recreation use appropriate activities and levels of use

Culture

- inventory of archaeological sites
- protection of archaeological sites
- recognition of any identified traditional native uses

G. Short Term Issues and Concerns

The following Activity/Use Matrix outlines guidelines for managing uses, activities and facilities in the Park. These guidelines reflect the intent of the LRMP and, in general principle, follow the policies as set out for use and management of provincial park natural environment zones.

Appendix - Activity / Use Matrix for Bedard Aspen

Activity/Use Facility	Natural Environment
Hunting	Y
Fishing	N/A
Trapping	Y^2
Grazing (domestic livestock)	Y
Recreational Gold Panning/Rock Hounding	N
Utility Corridors	N
Communication Sites	N
Horse Use/Pack Animals	Y^3
Guide Outfitting (hunting)	Y^2
Guide Outfitting (fishing)	N/A
Guide Outfitting (nature tours)	Y^2
Guide Outfitting (river rafting)	N/A
Cat-Assisted Skiing	N/A
Ski-Hills	N/A
Heli-skiing	N/A
Heli-hiking	N
Tourist Infrastructure - Resorts	N/A
Backcountry Huts / Lodges / Cabins / Guest Ranches	N/A
Water Control Structures	N2
Fish Stocking and Enhancement	N
Road Access	Y ¹
Off-road Access (snowmobiling)	Y ³
Off-road Access (motorized)	N
Off-road Access (mechanical activities)	N
Motorized Water Access	N/A
Aircraft Access	N
Fire Management (Prescribed)	N1
Wildlife Management Prevention & Preparedness Prescribed Fire Management	
Fire Management (suppression)	Y
Forest Insect / Disease Control	N1
Noxious Weed Control	Y
Exotic Insect / Disease Control	Y
Scientific Research (specimen collection) Scientific Research (manipulative activities)	N1 N1

Y= allowed, subject to conditions identified in the interim management statement or management plan

N= not allowed

N1=

allowed for expressed management purposes only not normally allowed, but if present at time of PA establishment, will normally be allowed to continue

Road access plan for this area designates open and closed roads
 By permit only
 On designated trails only
 On designated lakes only
