APPROVALS

KAMLOOPS GOAL 2 PROTECTED AREAS MANAGEMENT DIRECTION STATEMENTS - GOAL 2 BINDER APPROVALS PAGE

Forward

This binder contains 32 management direction statements developed under the direction of the Kamloops Land and Resource Plan Implementation Table and BC Parks. The government designated these protected areas in May, 1996. The 32 management direction statements provide strategic direction for these protected areas. Protected areas' roles, strategies and objectives will not change extensively over time. Management actions, implemented through operations plans, however, will change as priorities, funding and support resources come available.

Purpose of Management Direction Statements

Management Direction Statements provide strategic management direction for all protected areas that do not have a full management plan. MDS do not negate the need for future, more detailed management plans. Management Direction Statements also describe protected area values management issues and concerns; management strategy focused on immediate priority objectives and strategies; and, directional statements from other planning processes. While strategies may be identified in the MDS, the completion of all these strategies is subject to funding and funding procedures. In addition, all development associated with these strategies within the protected area is subject to the BC Parks Impact Assessment Policy.

BLUE RIVER - PINE PARK

MANAGEMENT DIRECTION STATEMENT

I. Introduction

A. Setting and Context

This 26.4-hectare Park protects an uncommon forest type on the North Thompson River in the town of Blue River. It is situated 230 kilometers north of Kamloops, and 130 kilometers northeast of Clearwater, on Highway 5.

This protected area was recommended through the Kamloops LRMP process and formally established on April 30th, 1996 as a provincial park through Order-in-Council under the *Park Act*. The park was then designated in Schedule E of the *Park Amendment Act, 1997*.

This Management Direction Statement is intended to provide direction and guidelines for managing Blue River - Pine Park for the foreseeable future.

II. Protected Area Values

A. Conservation

- combination of wetland and upland on sandy fluvial-glacial soils along the lower stretches of Blue River above confluence with North Thompson River
- representative of dry lodgepole pine forest type uncommon in the North Thompson valley; includes Douglas-fir and white pine
- unusual association of *Vaccinium myrtiloides* with lodgepole pine; significant ground lichens
- black bear habitat (berries)

B. Recreation and Tourism

- local cross-country skiing
- huckleberry picking

C. Cultural Heritage

- unknown

D. Significance in the Protected Areas System

- protects an unusual lodgepole pine forest type in the North Thompson River valley
- a small representative of the North Thompson River valley lowlands not represented in large protected areas. Contributes wetland and upland habitats to the series of protected areas along the North Thompson north of Clearwater.

- P63 Walhachin Park
- P64 Wire Cache Park

III. Other Land Uses and Interests

A. Existing Tenures

- all private lands are excluded
- Park designation under the *Park Amendment Act* ensures that all existing liens, charges, and encumbrances other than those applying to commercial logging, mining or energy exploration and development will continue to be authorized through issuance of park use permits. This policy recognizes all existing land act tenures, water rights, trapping licenses and other legal tenures and rights.

B. Adjacent Patterns of Land Use

- Canadian National Railway forms west boundary, with clearing and Highway 5 (Yellowhead) west of that
- cutblocks logged in 1973-1980 between eastern boundary and the North Thompson River. See Longer Term Issues and Concerns on page 4.
- local community park adjacent to the southern extension

C. First Nations Interests

- interest of local First Nations unknown

D. Other Agency Interests

The Park will be managed in close coordination with various resource agencies, particularly BC Environment and Ministry of Forests.

- road managed by Ministry of Forests
- opportunity to work with local government in adjacent community park

E. Private and Public Stakeholder Interests

- local cross-country skiers, other interests unknown

IV. Management Issues and Concerns

A. Integration with Other Land Use Planning Processes

This management statement, future management plans, and all resulting management actions will follow the intent and criteria set out by the Kamloops LRMP for the Blue River - Pine protected area.

B. Consultation and Future Planning

Planning and management of the park will conform to the goals, objectives and guiding principles as set forth in the Provincial Protected Areas Strategy. BC Parks is accountable for planning, administration and management of the park through application of the laws, policies and regulations granted under the *Park Act*. BC Parks will coordinate with other agencies, the LRMP table, various public planning groups and First Nations in amending the MDS or developing management plans for all of the new protected areas arising from the Kamloops LRMP.

This Management Direction Statement has been reviewed and approved in principle by the Kamloops LRMP implementation team.

C. Role of the Park

The primary role of Blue River - Pine Park is to protect the ecological integrity of the river riparian and upland habitats at this site. The park forms part of a system of small protected areas distributed along the North Thompson River which together capture representative examples of the river's diverse riparian and upland ecosystems. A secondary and minor role of the park is to serve community related recreation interests for cross country skiing, hiking, nature interpretation and other types of low impact activities.

D. Zoning

The zoning plan as shown on the adjoining page is preliminary and reflects the intent of the LRMP recommendations for Blue River - Pine Park. The Park is zoned as **Natural Environment** to maintain the area in a natural condition while allowing some recreational use.

E. Management Objectives and Strategies

In addition to accepting the basic principles of maintaining existing tenures and rights, the following objectives will direct the short and long-term management of the area:

- to maintain the natural qualities and conditions of the park
- to foster relationships with First Nations through ongoing consultation and discussion of their concerns and views on protected area management and planning
- to maintain the visual, recreational and tourism values
- to maintain the diversity of wildlife species and habitats
- to discourage the introduction of non-native plant species
- to allow for continued casual recreation use - walking, natural history, viewing, cross-country skiing

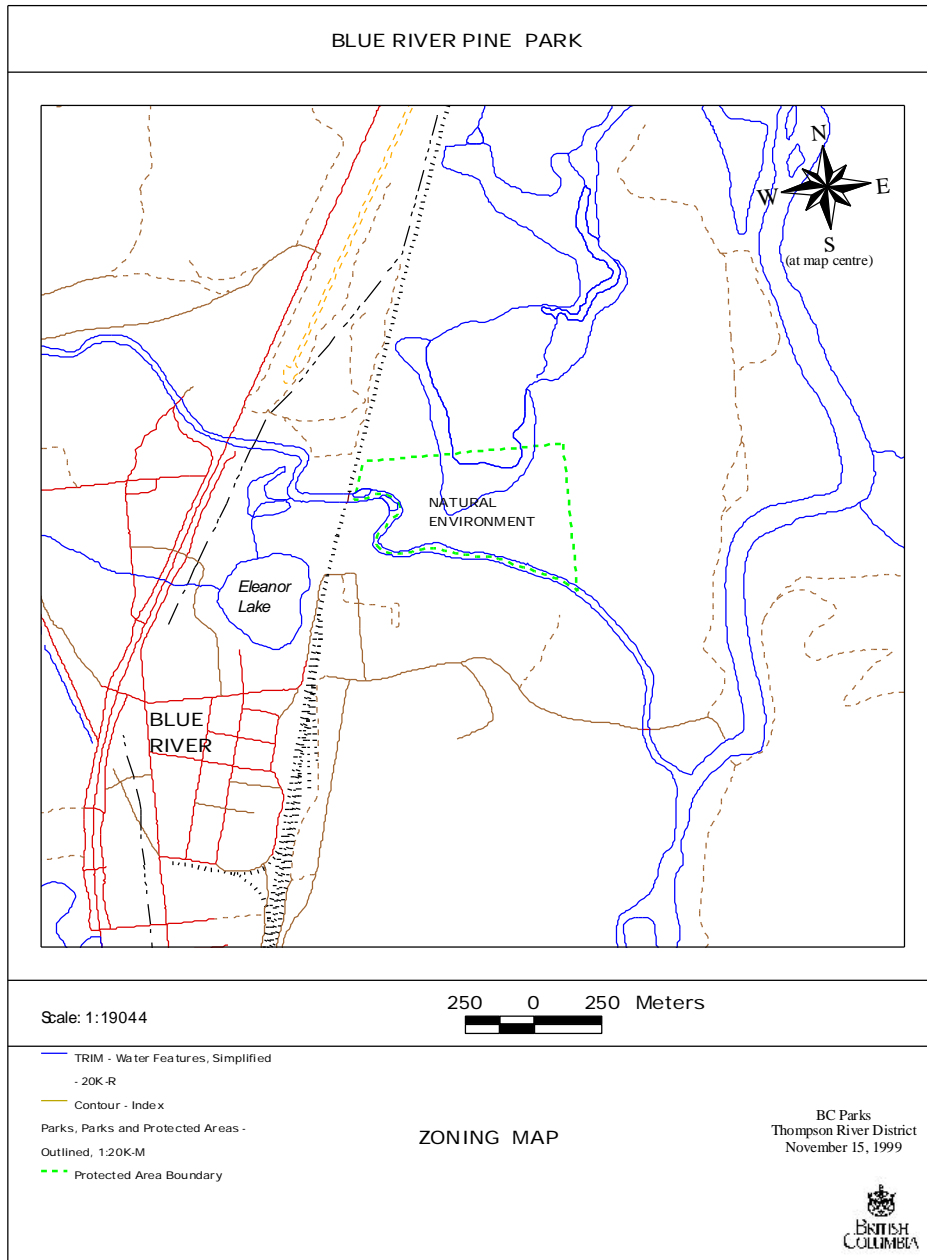

F. Longer Term Issues and Concerns

Specific issues that will be considered in the longer term can be highlighted under the following topics:

Conservation

- inventory of conservation values: possibility for rare/endangered species in this unique forest association
- vegetation management - protection for special species and habitats; protection of riparian areas for shade, food supply for fish; insect and disease control; fire management
- fisheries and wildlife management in coordination with management activities on surrounding lands
- forest activities on adjacent lands will be reviewed through the normal Ministry of Forests referral process.

Figure 2 – Zoning Map

Recreation

- access management, particularly in sensitive vegetation areas
- recreation use - appropriate activities and levels of use
- local community cross-country skiing use

Culture

- inventory of archaeological sites
- protection of archaeological sites
- recognition of any identified traditional native uses

G. Short Term Issues and Concerns

The following Activity/Use Matrix outlines guidelines for managing uses, activities and facilities in the Park. These guidelines reflect the intent of the LRMP and, in general principle, follow the policies as set out for use and management of provincial park natural environment zones.

Appendix -Activity / Use Matrix for Blue River - Pine Park

Activity/Use Facility	Natural Environment
Hunting	Y
Fishing	Y
Trapping	Y ²
Grazing (domestic livestock)	N
Recreational Gold Panning/Rock Hounding	N
Utility Corridors	N
Communication Sites	N
Horse Use/Pack Animals	Y ³
Guide Outfitting (hunting)	Y ²
Guide Outfitting (fishing)	Y ²
Guide Outfitting (nature tours)	Y ²
Guide Outfitting (river rafting)	N
Cat-Assisted Skiing	N/A
Ski-Hills	N/A
Heli-skiing	N/A
Heli-hiking	N
Tourist Infrastructure - Resorts	N/A
Backcountry Huts / Lodges / Cabins / Guest Ranches	N/A
Water Control Structures	N ²
Fish Stocking and Enhancement	N
Road Access	Y ¹
Off-road Access (snowmobiling)	Y ³
Off-road Access (motorized)	N
Off-road Access (mechanical activities)	Y ³
Motorized Water Access	Y
Aircraft Access	N
Fire Management (Prescribed) Wildlife Management Prevention & Preparedness Prescribed Fire Management	N1
Fire Management (suppression)	Y
Forest Insect / Disease Control	N1
Noxious Weed Control	Y
Exotic Insect / Disease Control	Y
Scientific Research (specimen collection)	N1
Scientific Research (manipulative activities)	N1

Y= allowed, subject to conditions identified in the interim management statement or management plan
 N= not allowed
 N1= allowed for expressed management purposes only
 N2= not normally allowed, but if present at time of PA establishment, will normally be allowed to continue

¹ Road access plan for this area designates open and closed roads
² By permit only
³ On designated trails only
⁴ On designated lakes only
