## Kamloops Area Management Planning Pilot Project Binder Approvals Page

### Forward

This binder contains 16 management plans developed under the Kamloops Area Management Planning Pilot Project. This project began in 1994 to develop, implement and evaluate a systems approach to management planning. The project concluded in October, 1996. The management plans contained in this binder provide long-term direction for a group of 10 Class A parks, five ecological reserves and one recreation area. The intention is to review this binder and the plans contained here at regular intervals. Plan vision statements and objectives will not change extensively over time. Management actions, however, will change as priorities, funding and support resources come available.

## **GOLDPAN PROVINCIAL PARK**

### **MANAGEMENT PLAN**

#### **Introduction**

This management plan defines the role of Goldpan Park within the provincial park system and the objectives and guidelines for managing the resources and visitor use activities in the park.

The park role, objectives and zoning as stated in this plan cannot be contravened in meaning or intent without consultation with the public and approval of the District Manager and the Parks Management Committee (PMC). A five year business plan is included as appendix B to provide direction for management and development of the park. The business plan is subject to annual review and adjustments.

#### **Background**

Goldpan Provincial Park was established in 1956 to provide the base for developing camping and day use facilities to serve tourists travelling along the Trans Canada Highway. This 5 hectare park has been developed to capacity with 14 campsites, 24 vehicle parking and 3 tables for Highway travel day use and 4 tables for river rafting day use.

The park receives heavy use averaging over 5,000 campers and 99,000 day users annually. Over 9,000 of the day users are river rafters. The Park also serves as a prime rest and lunch stop for river rafters on the Thompson River.

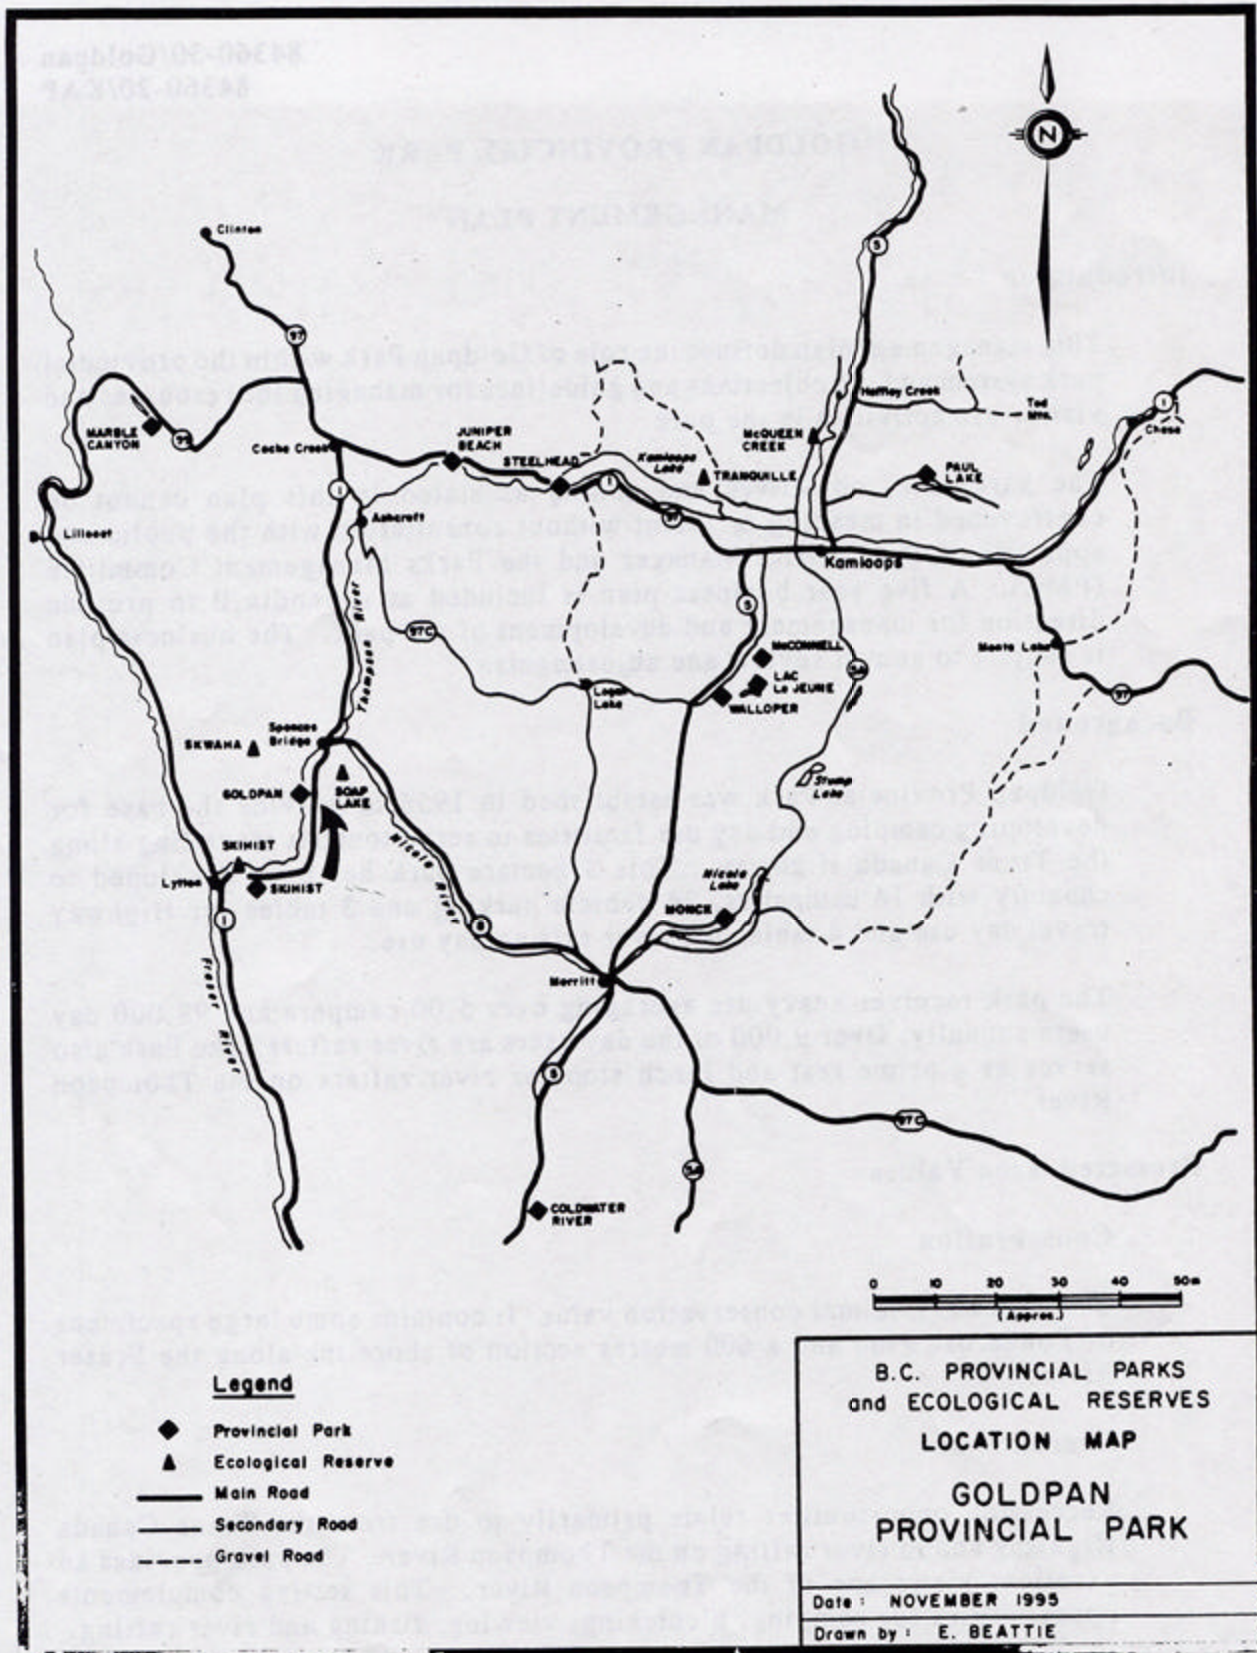

#### **Protected Area Values**

##### **Conservation**

The park has minimal conservation value. It contains some large specimens of Ponderosa Pine and a 600 metres section of shoreline along the Fraser River.

##### **Recreation**

Recreation opportunities relate primarily to use from the Trans Canada Highway and to river rafting on the Thompson River. The park provides an excellent viewscape of the Thompson River. This setting complements opportunities for camping, picnicking, viewing, fishing and river rafting.

## **Culture**

There are no known archaeological sites or resources in the park, but the site has direct ties to native travel routes and fishing on the Thompson River, and historic features such as the Cariboo Wagon road, the Fraser Canyon road and the CPR and CNR railways.

## **Vision Statement**

*For the foreseeable future, Goldpan Park will continue to provide camping and day use opportunities on the Thompson River.*

## **Conservation Role**

This park has the very limited conservation role of protecting some of the natural vegetation and river shoreline.

## **Recreation Role**

The primary role of the park is to maintain existing recreational opportunities for travel corridor and regional use with activities including camping, picnicking, viewing, fishing and natural and cultural interpretation.

As a secondary role, the park provides day use opportunities for river rafting.

## **Zoning**

The entire park is zoned as **Intensive Recreation**.

## **Management Objectives - Natural Resources**

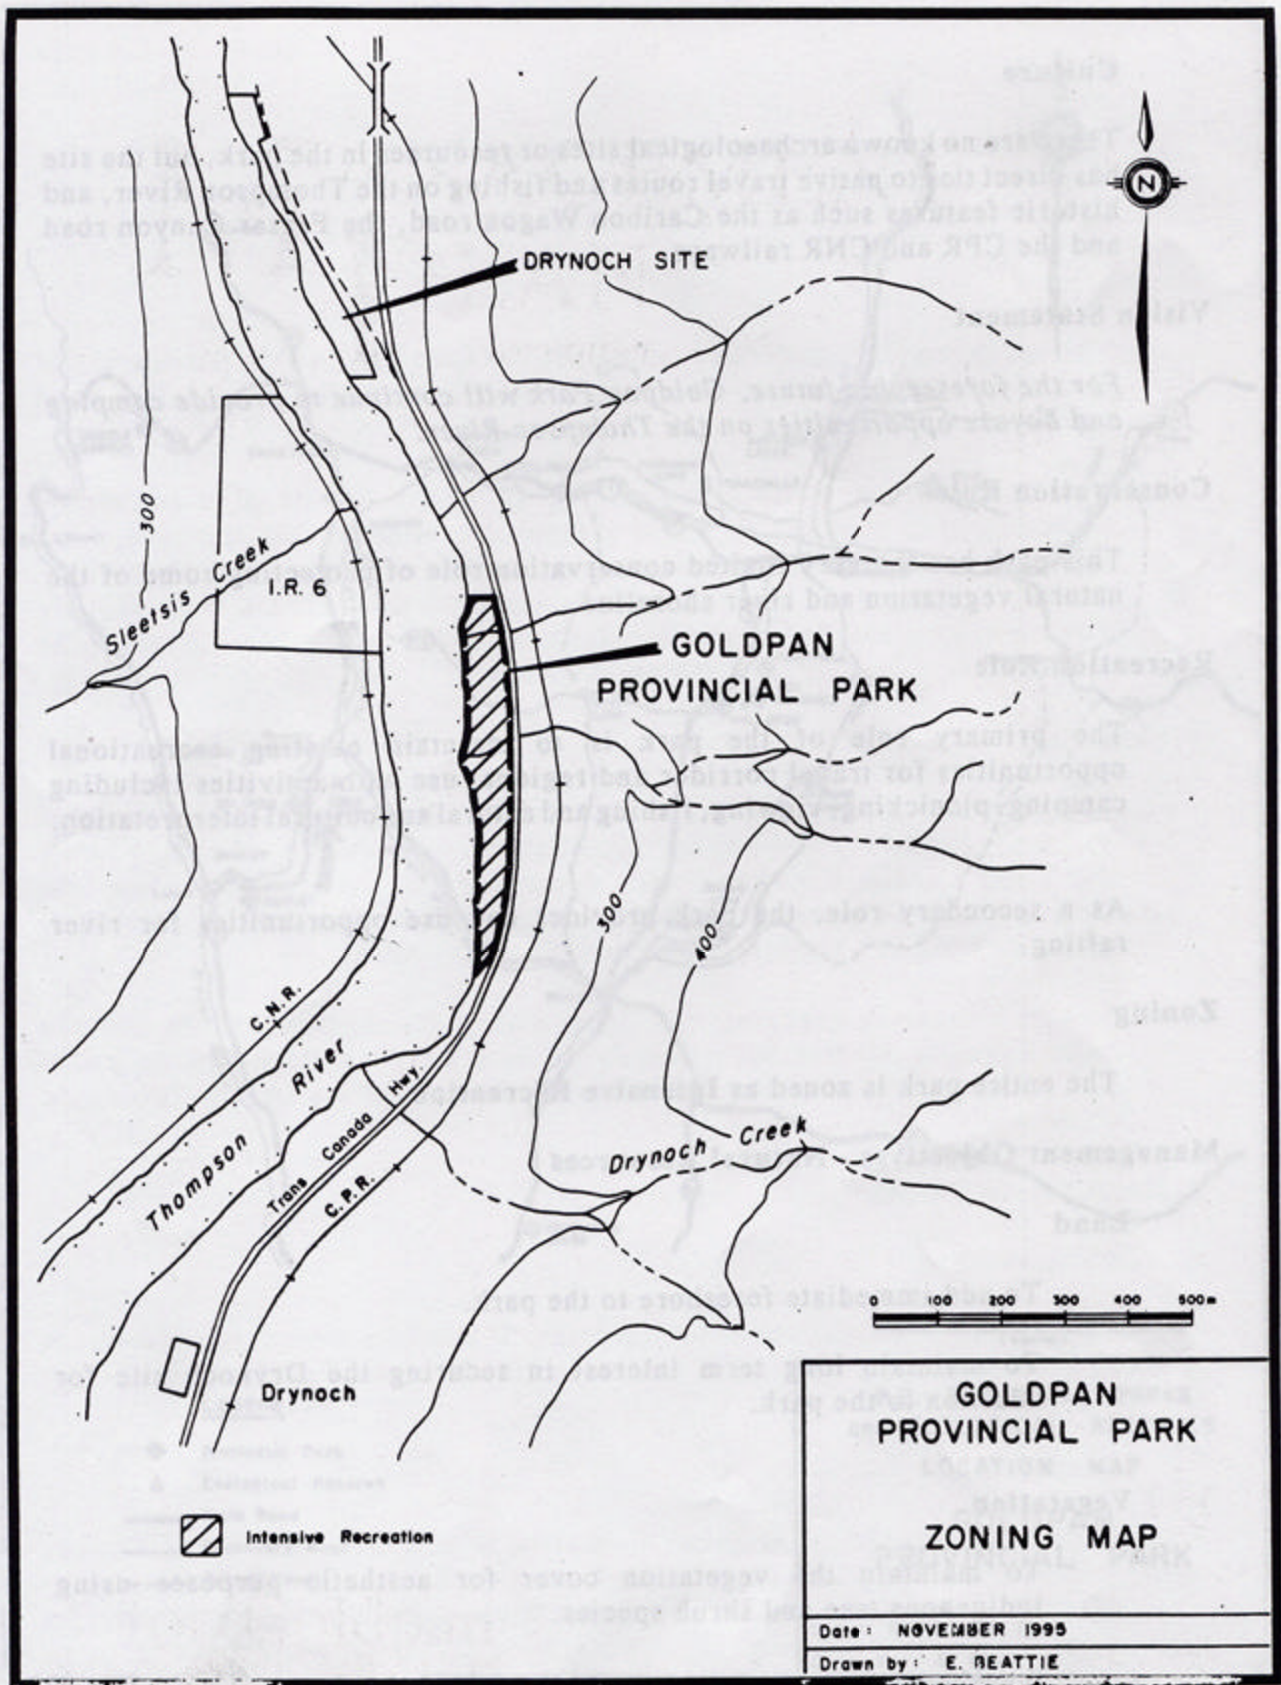

### **Land**

To add immediate foreshore to the park.

To maintain long term interest in securing the Drynoch site for addition to the park.

### **Vegetation**

To maintain the vegetation cover for aesthetic purposes using indigenous tree and shrub species.

## **Visual**

To ensure that park facilities are maintained in harmony with the park setting.

## **Management Objectives - Recreation Opportunities**

To provide facilities and service to service level 3 standards (see appendix A).

To ensure river rafting activities remain compatible with other uses of the park. River rafting site may require better definition and separation from day use and adjacent campsites.

To provide on-site interpretive information on the park, other parks along the Thompson River and in the District, natural history of the Thompson River Canyon, and the cultural history, incorporating history of local native peoples and their relationship with the river and the surrounding environments, and the development of transportation corridors.

## Appendix A - Service Level Explanation

BC Parks service levels provide a method of defining the facilities, information and services which the public can expect within the BC Provincial Parks system. The service levels do not include any measure of the capacity or use of the area, operating standards, or resource management issues. Instead, they are strictly a list of the key facilities and services that may be provided within a particular campground or day-use area. They also provide an opportunity to explore and understand the relationship between the facilities and services BC Parks offers and the expectations of the users or potential users. This will help in making decisions based on the type and grade of facilities and services that BC Parks plans to provide and their associated costs.

**Table 1. Campground Service Levels Attributes**

## **APPENDIX B FIVE YEAR BUSINESS PLAN**

### **Goldpan Park**

Goal: To maintain camping and day-use facilities as is.

Action: No action.

Goal: To protect riparian habitat along the Thompson River.

Action: Add foreshore to the park.
